A compelling memoir about a brilliant mathematician and engineer who helped put a man on the moon and dedicated his life to inspiring others.

From his childhood fascination with numbers to his pioneering work on the Apollo program, Richard H. Battin's life has been a testament to the power of curiosity and perseverance.

In this engaging memoir, Battin shares his personal and professional journey, offering a unique perspective on the making of modern science and technology. He describes his early love of math and science, his experiences as a student at MIT and Caltech, and his groundbreaking work on the development of inertial navigation systems.

Battin also chronicles his role in the Apollo program, where he was responsible for designing the guidance system that would take astronauts

to the moon. He provides a fascinating inside look at the challenges and triumphs of this historic mission.

Beyond his work on the moon, Battin has had a lifelong commitment to education and outreach. He has taught at MIT and Stanford, and founded the Astronaut Scholarship Foundation. He has also written extensively about math and science, and has received numerous awards for his contributions to the field.

My Story of Math, the Moon, and a Lifelong Mission is a captivating and inspiring memoir that celebrates the power of human curiosity and the importance of lifelong learning.

Reviews

"A fascinating account of a remarkable life. Battin's story is a testament to the power of curiosity and the importance of perseverance." -**Neil deGrasse Tyson**

"A gripping memoir that offers a unique perspective on the making of modern science and technology." -**Walter Isaacson**

"A must-read for anyone interested in math, science, or the history of space exploration." -**Buzz Aldrin**

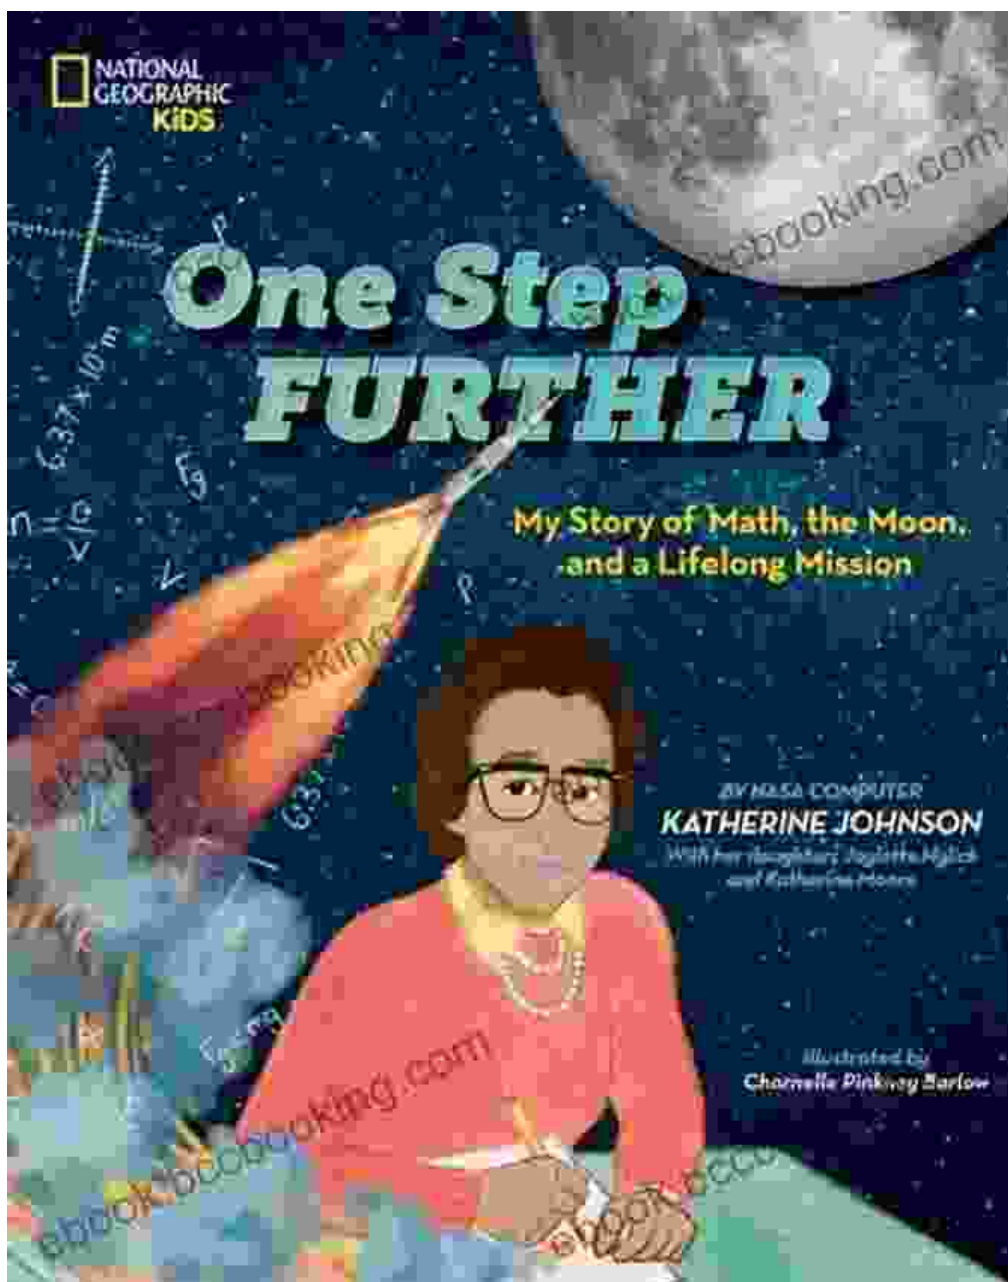

About the Author

Richard H. Battin is a mathematician and engineer who helped put a man on the moon. He is a professor emeritus at MIT and Stanford, and the founder of the Astronaut Scholarship Foundation. He has received

numerous awards for his contributions to science and education, including the National Medal of Science.
