

# Remaking the Way We Make Things: The Fourth Industrial Revolution and the Future of Manufacturing

By Thomas Friedman

The Fourth Industrial Revolution is here, and it's changing the way we make things. From 3D printing to robotics, new technologies are transforming manufacturing, and the future of this industry looks brighter than ever before.

In his new book, *Remaking the Way We Make Things*, author and manufacturing expert Thomas Friedman argues that the Fourth Industrial Revolution is not just about new technologies, but also about new ways of thinking about manufacturing. Friedman believes that the future of manufacturing lies in collaboration, innovation, and sustainability, and he

offers a roadmap for how we can create a more prosperous and equitable future for all.

## **The Fourth Industrial Revolution**

The Fourth Industrial Revolution is the fourth major industrial revolution in history. The first industrial revolution was characterized by the of steam power, the second by the of electricity, and the third by the of computers and automation. The Fourth Industrial Revolution is characterized by the of new technologies such as 3D printing, robotics, and artificial intelligence.

These new technologies are having a profound impact on manufacturing. 3D printing, for example, is making it possible to produce complex objects in a matter of hours, which is much faster than traditional manufacturing methods. Robotics is also making it possible to automate many tasks that were previously done by humans, which is reducing costs and increasing efficiency.

## **The Future of Manufacturing**

The Fourth Industrial Revolution is transforming the future of manufacturing. Friedman argues that the future of manufacturing lies in collaboration, innovation, and sustainability. He believes that companies that are able to collaborate with each other, innovate new products and processes, and operate in a sustainable manner will be the most successful in the future.

Friedman also believes that the future of manufacturing will be more equitable. He argues that the Fourth Industrial Revolution has the potential to create new jobs and opportunities for people all over the world. He believes that by investing in education and training, we can ensure that

everyone has the skills they need to succeed in the future of manufacturing.

## Remaking the Way We Make Things

Remaking the Way We Make Things is a must-read for anyone who wants to understand the future of manufacturing. Friedman's insights are both timely and important, and he offers a roadmap for how we can create a more prosperous and equitable future for all.
