

William Mulholland and the Inventing of Los Angeles: A Journey Through Water, Power, and Dreams

The Man Who Built Los Angeles

William Mulholland was a visionary engineer who played a pivotal role in shaping the destiny of Los Angeles. Born in Ireland in 1855, Mulholland immigrated to the United States in his youth and quickly rose through the ranks of the Los Angeles water department. In 1902, he was appointed superintendent of the department, a position he held for over two decades.

Mulholland's most famous achievement was the construction of the Los Angeles Aqueduct, a massive water project that brought water from the Owens Valley to the growing city. The aqueduct was an engineering marvel that required years of planning and execution. It opened in 1913 and transformed Los Angeles into a thriving metropolis.

Rivers in the Desert: William Mulholland and the Inventing of Los Angeles by Margaret Leslie Davis

But Mulholland's legacy is more than just the aqueduct. He also played a key role in the development of the city's electrical system, its flood control system, and its transportation system. He was a tireless advocate for the growth of Los Angeles, and his vision helped to make it one of the most vibrant and successful cities in the world.

The Inventing of Los Angeles

The story of William Mulholland is inextricably linked to the story of Los Angeles. The city grew up around water, and Mulholland was the man who brought the water to Los Angeles. He was also responsible for many of the other systems that made the city possible, including its power and transportation systems.

Mulholland's vision for Los Angeles was a city of progress and prosperity. He believed that the city had the potential to be one of the greatest in the world, and he worked tirelessly to make that vision a reality. His legacy is a city that is still growing and thriving today, a testament to his vision and determination.

A Journey Through Water, Power, and Dreams

William Mulholland and the Inventing of Los Angeles is a journey through the life and work of one of the most important figures in the history of the city. Author Katie Boehret tells the story of Mulholland's childhood in Ireland, his immigration to the United States, and his rise to prominence in Los Angeles.

The book is filled with fascinating details about the construction of the Los Angeles Aqueduct and the other projects that Mulholland oversaw. Boehret also explores the personal life of Mulholland, including his close relationship with his wife and children. The result is a rich and engaging portrait of a complex and fascinating man.
